AVEVA™ SYSTEM PLATFORM

AVEVA System Platform with Operations Management Interface (OMI) is the world's only responsive, scalable solution for supervisory, advanced SCADA, MES, and IIoT applications that contextualizes operations processes across the organization. AVEVA System Platform provides a collaborative, standards-based foundation that unifies people, processes, and assets across all facilities for continuous operational improvement and real-time decision support.

AVEVA™ UNIFIED OPERATIONS CENTER

AVEVA Unified Operations Center is an enterprise visualization solution for creating intelligent operations centers. Based on a system of systems approach, AVEVA Unified Operations Center brings together operations technology (OT), information technology (IT), and engineering technology (ET). A single-pane-of-glass software environment provides actionable information in context to industrial operations.

AVEVA™ MANUFACTURING EXECUTION SYSTEM

AVEVA Manufacturing Execution System manages all inventory, production and quality- related plant activities to produce quality products at the lowest cost. It captures and contextualizes all data related to the transformation of raw materials into finished goods, giving companies enterprise-wide, real-time visibility into plant operations. That visibility lets companies perform data-driven continuous improvement as well as track products and trace materials in minutes. It uses a reusable, model-driven approach to standardize best practices, KPIs and reporting across multi-site operations and can easily scale from edge to enterprise to shorten the time-to-value for operational excellence initiatives.
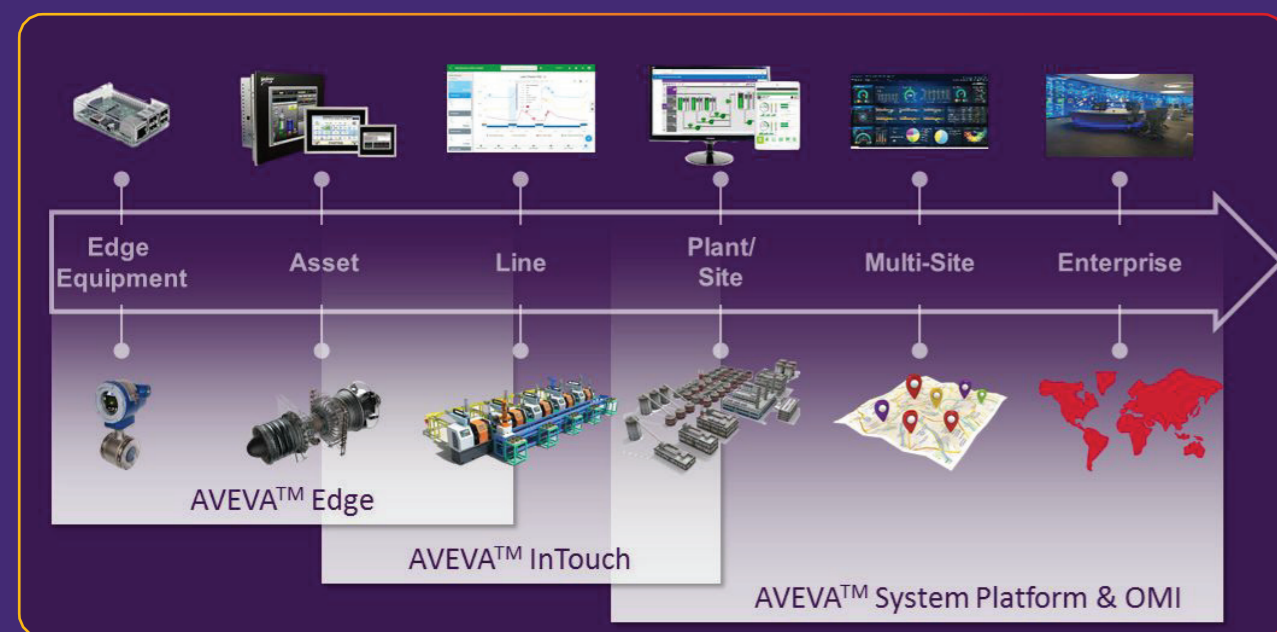

AVEVA™ INTOUCH HMI

AVEVA InTouch HMI, formerly Wonderware powers more than 100,000 plants and factories around the world, helping to achieve world-class performance, reduce costs and improve product quality.
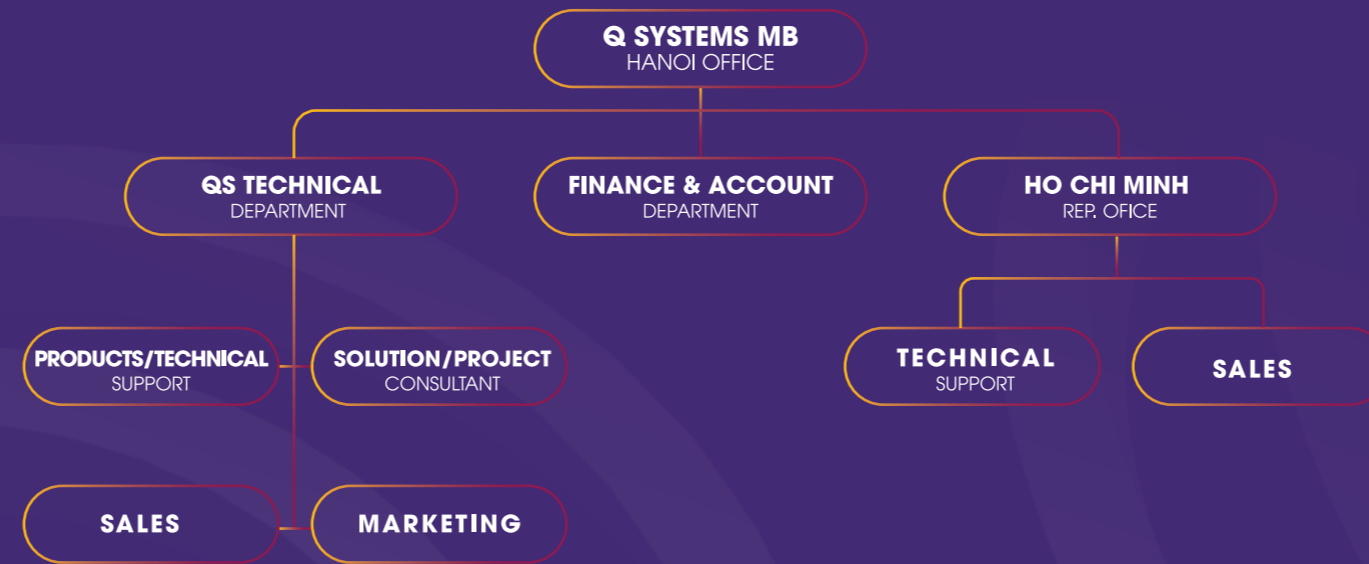

AVEVA™ INSIGHT

Make better and faster decisions with complete visibility of your operations at your fingertips. AVEVA Insight delivers actionable information and artificial intelligence capabilities to help your teams improve asset reliability and operational performance.

AVEVA™ HISTORIAN

Capture and store high-fidelity industrial data. AVEVA Historian is a process database integrated with operations control that gives you access to your process, alarm, and event history data.Combining advanced data storage and compression techniques with an industry-standard query interface, AVEVA Historian brings high-performance simplicity to your team. It makes sure your team is fully aware of operational performance for faster troubleshooting and more informed decisions.

SOFTWARE SOLUTIONS FOR REALTIME SUCCESS

WHAT WE DO

- Supply industrial software & hardware, integrated management and control solutions.
- Supply consultancy and technical support.
- Provide technical & product training.

AVEVA™ Unified Operations Center

SMART CITIES
Unify city services in support of daily situational awareness.

RENEWABLE POWER
Oversee fleets of solar and wind assets in context to visualize their generation contribution.
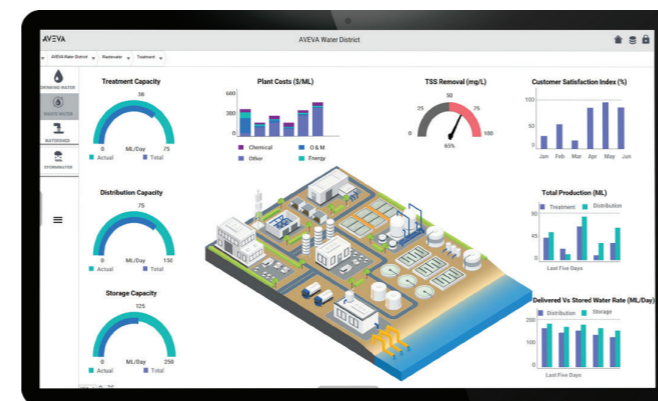

MINING
Enable agile decisions across the entire mining value chain.

MIDSTREAM OIL AND GAS
Proactively resolve pipeline events and promote safety.

WATER
Manage geographically dispersed and vital water operations.

DATA CENTERS
Achieve a multi-layered view of global data center health.

MARINE – SHIPS AND SHIPYARDS
Track vessel performance and manage shipyard production.

CONSUMER PRODUCTS
Load balance facilities, increasing production responsiveness.
