CONSULTING**  
About Us

## **DMTEK Consulting is your specialized partner in manufacturing IT services, offering optimal consulting services tailored to your needs.**

We facilitate a comprehensive manufacturing management platform that enables flexible information sharing and collaboration between cloud-based manufacturing management solutions and groupware. This platform fosters an organic collaborative environment between manufacturing operations and office tasks.

Aiming to upgrade outdated systems in Korea's small and medium-sized manufacturing sector, we currently deliver cloud-based production management systems to 57 factories domestically. Our integrated services encompass Cloud MES, Groupware, Collaboration Tools, Data Collection, AI, and Virtual Factories, all geared towards revolutionizing and expanding the supply chain in the South Korean manufacturing industry.

# Vision & Values

---

## Leaders in Smart Manufacturing Cloud Services, Growing Hand-in-Hand with the Manufacturing Sector

We are deeply committed to customer-centric practices, recognizing that customer value creation translates directly to our company's success.

Our focus is to become a trusted partner for our customers, growing mutually based on their growth.

Through our inventive and continuously evolving smart solutions, we spearhead changes and innovations in the enterprise landscape.
